BJCree - Documentation

Thank you for your interest in the BJCree fonts. The BJCree typeface was originally designed in conjunction with the Naskapi community in the 1990s. When it was subsequently re-encoded for Unicode, coverage was extended for all the Cree (and Ojibwa) languages.

This documentation is a set of HTML pages that can be viewed in any modern web browser. PDF versions of these pages are also provided. This content, plus download links and a contact form, are available from the BJCree site.

- About Information about this project and SIL International
- Resources Help with installation and use
- FAQ Common questions and answers
- Design History and background of the design
- Character set support Details of Unicode characters that are supported
- Font features Using smart font features
- Support How to get additional support
- Developer information How to modify and build the fonts
- Versions Sources for alternate versions
- Version history Complete version history

Additional information is also provided in other project files: README.txt, OFL.txt, OFL-FAQ.txt, and FONTLOG.txt.
